Subject: ATSDR's review of air toxics data so far for Ames Warehouse

Hi guys

We are working on our review on the ATSDR side of the air toxics data from EPA, OH, and CTEH. Nothing acute noted, just some long term/cancer type exceedances. We were thinking of holding on to this draft until the next round of EPA's air data, the ash data and any other water data might come in the next week or so, and covering all of that info. Does that sound ok to you? I can check in with Walt, Jim and Rebecca at state/local level too but wanted to get your opinion first. Also, I am assuming the email format we have been using is still ok, or would you appreciate something more formal?

Lora
